## EXPERIENCE

---

**FICE** · in collaboration with Microsoft *Jan 2026 – Present*  
*AI Intern*

- Built a climate change prediction model using historical climate datasets (Python), owning the full workflow from data scoping and feature engineering to prototype delivery.
- Collaborated cross-functionally to align AI capabilities with real-world product use cases, iterating the model based on stakeholder feedback.

**CSR Box** *May 2025 – Aug 2025*  
*Technology Intern*

- Designed and developed an AI-powered automation tool to streamline internal NGO operations, cutting manual effort in repetitive data-processing workflows.
- Conducted stakeholder conversations to surface operational bottlenecks and translated findings into scoped product requirements.

## PROJECTS

---

**KnightCraving** · React · JavaScript  
Demo: <https://knight-craving.vercel.app/>

- Conceptualized and shipped a food price-comparison platform aggregating data across Zomato and Swiggy, enabling users to identify savings of up to 25% on identical orders.
- Owned the full product lifecycle — problem discovery, MVP scoping, and React prototype delivery — targeting cost-conscious consumers in Tier-2 Indian cities.

**Local Link** · JavaScript · React  
*GitHub repo · Live link coming soon*

- Architected a two-sided marketplace connecting households with verified local service providers (plumbers, electricians, mechanics), addressing a key service-discovery gap in India.
- Defined product requirements, user personas, and a phased execution roadmap from concept through functional prototype.

## CERTIFICATIONS

---

**Electronic Arts: Product Management Job Simulation** · Forage *Jul 2025*

- Practiced defining KPIs for mobile game features, analyzing player behavior data, and developing go-to-market product strategy in a simulated PM environment.

## EDUCATION

---

**Government Engineering College Rajkot** *Expected Jun 2026*  
*B.E. – Artificial Intelligence & Data Science | GPA: 7.32*

## SKILLS

---

**Product:** Product Roadmapping · MVP Scoping · KPI Definition · User Research · Wireframing (Figma)

**Technical:** JavaScript · React · Python · SQL · HTML/CSS

**Tools:** Git/GitHub · Figma · Vercel

**Core:** Cross-functional Collaboration · Systems Thinking · Problem Solving
